**PROFESSIONAL BOARD FOR EMERGENCY CARE**

**ESTABLISHMENT OF RESEARCH COMMITTEE**

The Professional Board for Emergency Care (PBEC) established a Research Committee to champion the emergency care research interests related to the profession. It is envisaged that together with its stakeholders, this committee will develop a research agenda for the emergency care profession in order to improve the emergency care knowledge creation, transfer and utilization. The Research Committee would like to invite all practitioners to submit any of their articles/publications or theses to the PBEC as we would like to keep track of the relevant emergency care research in the country. Lastly, the research will be disseminated to the practitioners through the appropriate Council structures in an effort to keep practitioners abreast with the latest research available from within the South African community.
